

## LbQ WebSockets - Smoothwall

Use the following steps to allow access to LbQ WebSockets if you are using the Smoothwall filtering system.

1. Create a new category which to store the WebSocket domains. Go to Guardian -> Policy Object -> Categories.
2. Enter a name for the new category. For example, Websocket.
3. Enter lbq.org into Domain/URL filtering and click Save.
4. Go to Guardian -> HTTPS Inspection -> Policy Wizard and enter the following options:
  - a. Who: Everyone\*
  - b. What: Websocket
  - c. Where: Everywhere\*
  - d. When: Always
  - e. Action: Do no inspect

\* Change as appropriate
5. Make sure Enable Policy is selected and click Confirm.
6. Move the newly created policy above any policies for 'Decrypt and Inspect'.
